

FOR IMMEDIATE RELEASE: Wednesday, 26th June 2024

The European Society of Minimally Invasive Neurological Therapy (ESMINT) signs a Memorandum of Understanding with the French Society of Neuroradiology (SFNR).

ESMINT and SFNR, acknowledging their shared goals and interests, have established a formal collaboration to benefit their members and enable the provision of the highest standards of patient care.

Zurich, Switzerland: ESMINT and SFNR formalized their collaboration to define joint actions, achieve the best possible outcomes, and enhance the visibility of both organizations. As outlined in the agreement, the signed Memorandum of Understanding commits to efficient and transparent communication between the two Societies.

The MoU was signed by Professor Zsolt Kulcsár and Professor Hubert Desal, Presidents of ESMINT and SFNR, respectively, and Professor Christian Taschner, Treasurer of ESMINT.

The agreement provides SFNR members joining any category of ESMINT membership a 20% discount and ensures mutual access to each other's membership and scientific platforms.

ESMINT, recognized as a leading neurointerventional society and members' association in Europe, is committed to collaborating formally and informally with all European national neurointerventional societies. The ultimate goal is to enhance patient treatment across the continent.

ESMINT (European Society of Minimally Invasive Neurological Therapy) was established in 2009 to promote the benefits of minimally invasive neurological therapies in Europe through training and education and high-quality scientific research. It is an interdisciplinary society, representing medical practitioners and scientists working in the field of neuroradiology, interventional neuroradiology, neurointerventional surgery, endovascular neurosurgery, and vascular neurology.
