Minimally Invasive Neurological Therapy

ESMINT Stroke Fellowship Programme

Considering the growing need for trained neurointerventionalists in the field of ischemic stroke, ESMINT has decided to build a program (***ESMINT Stroke Fellowship Program***) for physicians wishing to obtain competence in Acute Ischemic Stroke Interventions (AISI) as defined by EBNI.

The goal of the stroke fellowship program is to train young neurointerventionalists in stroke procedures by offering a financial support to join an INR training center.

By the end of the training period, trainees are supposed to have performed at least **25 stroke procedures as first operator** and to be able to manage clinically and endovascularly the vast majority of the stroke cases referred to their own center.

This program will consist of 2 parts:

- A theoretical course dedicated to AISI
- A practical part (1-year training in an EBNI certified center) supported financially by ESMINT

Eligible Physicians:

- Licensed European physicians,
- ESMINT members
- Up to the age of 40 years
- 6 months in diagnostic neuroradiology (including diagnostic neuroangiography) + 6 months training in clinical neurosciences
- Working in a hospital with neuro facilities (EBNI-certified INR center, neurosurgery, stroke unit).

ESMINT - Central Office

Seefeldstrasse 88, 8008 Zurich, Switzerland

Phone: + 41 (0)44 388 40 83, Fax: + 41 (0)44 388 40 89, office@esmint.eu

www.esmint.eu

Applications have to be addressed to: office@esmint.eu together with a CV.

The selection of the applications will be performed by:

- 1 ESMINT board member,
- 2 ESMINT ExCom members.

Start of the programme: September 2018
